Fire Sprinkler Inspection - Quarterly
Site Name: Richard Milburn Academy
Site Address: 1031 Mason Ave

Date: 06-04-2024
Service Call ID# 240601-1275

ID: 1040 (Ref. NFPA-25, 13.3.2.1 through 13.3.2.1.2, 13.3.2.2)

Weekly inspection items which can be performed monthly if the items are electronically supervised or secured with locks:

Control valves:

In normal (open or closed) position?

Sealed, locked or supervised?

Accessible?

Post indicator valve(s) provided with appropriate wrenches?

Free from external leaks?

Provided with identification sign?

Provided with sign indicating area served?

All Results Satisfactory? Yes

ID: 3600 (Ref. NFPA-25, 13.8.1; Elements of Performance: EC.02.03.05, EP10) Joint Commission Note: Yes = Pass; NO = FAIL

Quarterly Inspection Items:

Fire department connections:

Visible and accessible?

Couplings and swivels not damaged and rotate smoothly?

Plugs or caps in place and undamaged?

Gaskets in place and good condition?

Identification sign(s) in place?

Check valve is not leaking?

Automatic drain valve in place and operating properly?

Clapper is in place and operating properly?

No obstructions in interior of connection?

Visible piping supplying fire department connection undamaged?

All Results Satisfactory? Yes (Pass)

ID: 3900 (Ref. NFPA-25, 13.2.5.1.1)

Quarterly Inspection Items:

Gauge(s) (Water) on wet pipe (shotgun, riser check or alarm valve) sprinkler system(s):

Operable and not physically damaged? Yes

ID: 3960 (Ref. NFPA-25, 13.2.5.1.2)

Record Supply and System Pressure:

System: **Riser** Supply Water Pressure: **65 PSI** System Water Pressure: **75 PSI**

Are these wet pipe system water pressure readings comparable to previous inspections? Yes

ID: 4260 (Ref. NFPA-25, 13.4.1.1)

Quarterly Inspection Items:

Alarm valve(s) and/or system riser check valve(s):

Free from physical damage, all trim valves in appropriate (open or closed) position, and no leakage from retarding chamber or alarm drain? Yes

ID: 4280 (Ref. NFPA-25, 13.2.4.3.1; Elements of Performance: EC.02.03.05, EP2) Joint Commission Note: Yes = Pass; NO = FAIL

Quarterly Inspection Items:

Waterflow alarm device(s):

Mechanical waterflow, vane-type, paddle-type and pressure switch type free of physical damage? Yes (Pass)

ID: 9500 (Ref. NFPA-25, 13.2.3.2; Elements of Performance: EC.02.03.05, EP9)

Quarterly Test Items:

Main drain test where sole water supply is through a BF preventer and/or PRV, test conducted on at least one system downstream of device?

System: Riser

Location: Rear riser room

Static Pressure: 65 PSI

Residual Pressure: 60

Was flow observed? Yes

Time for supply pressure to return to normal (sec): ${\bf 2}$

There is less than a 10% reduction compared to original test or previous tests? Yes (Pass)

ID: 18000

A record tag must be placed on each system:

#1: Riser

Type of System: Wet

There were no previous inspection deficiencies or all previous deficiencies have been repaired? Yes

Tag: Green
